

As a legacy of the 2012 Olympic games, the government provides additional PE & Sport funding to sustain and improve the provision for physical education (PE) and sport in primary schools. Schools must spend the additional funding on improving their provision of PE and sport, but they have the freedom to choose how they do this. This statement outlines how we have invested our funding and the impact of our previous years expenditure.

At our school we are committed to ensuring our children understand the importance of being active, having a healthy lifestyle and enjoy sports and games activities.

In 2017/18 we will invest this money in:

- using a specialist PE teacher to work with our teachers and develop their skills and subject knowledge when teaching PE
- providing cover to release primary teachers for professional development in PE and sport
- providing places for pupils in a Cycling Club and for Cycling activities
- Pooling the additional funding with our partner schools to enable interschool competition and shared resources.
- Providing pupils with opportunities to take part in a wider variety of sports and outdoor activities which would not usually form part of a primary curriculum

Sports & PE Funding 2017-2018

Number of pupils and sports funding received	
Total number of pupils on roll eligible for Sports & PE Funding	237
Amount received per pupil	£47.10
Total amount received	£18,370

Deployment

The following costs are not exact but a near estimate at the time of calculations.

Use of funding (Please see attached breakdown of Expenditure)	Total amount of funding allocated to Sept 17-Mar 18	Total amount of funding allocated to Apr 18-Aug 18
Hiring specialist PE teacher (James Mulvany)	£3,792	£2,212
Providing cover to release primary teachers for professional development in PE and sport	£2,640	£1,540
Teaching Resources to help teachers to teach PE and sport	£282	£202
Providing places for pupils on the Cycling Club and cycling activities	£3,488	£3,480
Providing a range of coaches and activities during our Keeping Healthy Week.	£515	£221
Total expenditure	£10,716	£7,654
Overall Total Grant expenditure	£18,370	

Impact

The school will measure the impact of the sports fund grant spending at the end of 2017/18 through pupil interview, evaluations completed by the sports coach and analysis of attendance at clubs and activities.

Impact in 2016/17:

- All of our class teachers had the opportunity to work with our specialist sports coach to develop their skills in teaching physical education including 1:1 coaching and whole school training. A log of the areas covered demonstrates a wide range of skills and techniques being shared and modelled with teachers showing increased confidence in teaching key skills in these areas and teaching from our school curriculum.
- All pupils took part in a Keeping Healthy Week which provided opportunities to take part in activities such as volleyball, tennis and Taekwondo, as well as athletics, team games and healthy food workshops. The pupil evaluations of this week were overwhelmingly positive.
- We have developed our own scheme of work to ensure full coverage and progression through the national curriculum.
- Successful inter-school sports competitions were organised by the specialist teacher which led to our pupils competing with children from other schools in different sports.
- Lessons were well equipped and our pupils benefited from a range of sports games and activities both in lessons and in the playground including cricket and handball.
- Affordable after School clubs run by sports coaches in ballet, street dance, kung Fu and football as well as a cooking club were run every week and very popular. Pupil evaluations were highly positive and these sessions were made accessible for all through subsidised pricing.
- 93% of responses to the 2016 parent survey were positive in relation to the statement that they felt the school encouraged their child to exercise or participate in healthy sports, and 89% felt that the school encouraged their child to eat and drink healthy things.
- 93% of responses to the 2016 pupil survey were positive in relation to the statement that they were encouraged to exercise or participate in healthy sports, and 87% stated positively that they were taught to eat and drink healthy things.
